

Paper Cup Lighthouse

Building lighthouses is easy and fun when you use these simple materials:

tower = large soda cup
lantern = clear plastic cup cut to fit
cupola = disk of black paper curled into a cone shape
keeper's house = empty, washed small milk carton
island = paper plate turned upside-down
waves = crumpled cellophane

You'll need glue, tape, and paint to finish your lighthouse.

You can add your own details -- small pebbles to make rocks, twigs and small pine boughs to make trees, plastic toy people and boats.

You can even put a beacon in your lighthouse.
